COUNTY BOROUGH OF BOURNEMOUTH.

ANNUAL REPORT

OF THE

Medical Officer of Health

For the year 1923.

Health Department,

Town Hall,

Bournemouth.

May, 1924.

TO THE CHAIRMAN AND MEMBERS
OF THE HEALTH COMMITTEE,
COUNTY BOROUGH OF BOURNEMOUTH.

Gentlemen,

I beg to submit my Annual Report on the health of Bournemouth for the year 1923. In general the health of the community was good, the incidence of the acute infections having been light.

Population. The Census of 1921 recorded 91,770 as the population of Bournemouth, and my estimate for the year 1923 is 95,600. As stated in my report last year, the Registrar General decided to deduct 10,570 from the actual Census figure for Bournemouth and he estimates the population for the year 1923 as 82,200.

The statistical rates in this report are based on the Registrar General's figures. These estimates of population made by the Registrar General are so much below the actual population of Bournemouth as recorded in the Census and so much below the estimate made by the Medical Officer of Health of the population during the past decade that it is impossible to base on them a comparison of statistics from year to year. In this report, therefore, wherever a comparison is made of the year under review with past years the figures are based on the actual Census figure for 1921 and the corresponding estimates for the surrounding years.

The *Infantile Mortality*, that is the number of deaths under one year per thousand births, was 59.81, as compared with the average of 70.59 for the preceding ten years, and of 90.27 for the years 1903 to 1912.

In the decline and fall of diseases there are usually many causes at work, some of which are still not fully understood. The ailments causing child mortality are no exception to this rule, but one factor is recognised as contributing to their elimination: the education of mothers in the best methods of infant rearing. This work has been carried on for some years by Voluntary and Municipal effort, and the thanks of the community are due especially to the members of the Infant Welfare Voluntary Association for their excellent work at the four Municipal Centres.

I beg to thank the Chairman and Members of the Health Committee for their consideration and the staff in general for their co-operation in the work. I wish also to express my thanks to the retiring Chairman, Alderman J. E. Beale, for the assistance and unvarying kindness which he has shown to me during the time I have held my present post.

I am, Your obedient servant,

> A. D. EDWARDS, Medical Officer of Health.

SUMMARY OF STATISTICS

and general information relating to the County Borough of Bournemouth.

- 1. Area of the County Borough: 6,643 acres.
- 2. Geological Information. Bagshot Sands Series. Subsoil—Silicious Sand.
- 3. Population. Census of June, 1921: 91,770.

Estimated 1923: 95,600.

Estimate of Registrar General: 82,200.

No. of persons per house, 5.2 (R.G.

Density of Population: No. of persons per acre, 14 39 (R.G. 12.37).

4.4).

- 4. Birth Rate: 11·19 (R.G. 13·01) per 1,000 in 1923.
- 5. Infantile Mortality: 59.81 per 1,000 births.
- 6. Death Rate: 11.71 (R.G. 13.62) per 1,000.
- 7. Phthisis Death Rate: .83 (R.G. .97) per 1,000.
- 8. Influenza Death Rate: 14 (R.G. 17) per 1,000.
- 9. Number of Cases of Infectious Diseases per 1,000 of the Population. Scarlet Fever 1.25, Diphtheria 58, Para-typhoid Fever 05, Variola 00, Erysipelas 16.
- 10. Number of Inhabited Houses: (1911) 15,000, (1923) 18,314.
- 11. Rateable Value: (1923) £876,116.
- 12. Rates Poor and General District Pates (1923) 8/5 in the £.
- R.G. Signifies Rate based on Registrar General's estimate of the population of 82,200.

* Estimated on 1915 population figure.
† Estimated on new civil population figures supplied by Registrar-General.

MATERNITY AND CHILD WELFARE.

(a) During the year 1,135 births occurred in the County Borough of Bournemouth, of which 115 were transferred to other districts by the Registrar General and 50 transferred into Bournemouth from other districts, the net births in Bournemouth being therefore 1,070, making a birth rate of 11.19, and on the Registrar General's estimate of the population, 13.01.

The following table shows the birth rates for previous years:—

1913 1914 1915 1916 1917 1918 1919 1920 1921 1922 15.6 13.4 14.0 16.0 12.4 12.4 11.8 16.3 13.912.0

Of the 1,135 births that actually occurred in the County Borough 1,072 were notified. Of these notifications 528 were made by doctors, 534 by midwives and 10 by other persons.

(b) Infantile Mortality. Seventy-seven infants died during their first year of life. Of these deaths 17 were transferred to other areas, and 4 transferred to Bournemouth from other districts. The number of infant deaths referred by the Registrar General to Bournemouth was therefore 64, making an Infantile Mortality of 59.81.

Of the 64 infant deaths, 16 were certified as due to premature birth, 6 to pneumonia and 8 to congenital malformations. No child under twelve months died from any notifiable infectious disease.

The following table gives the rate of Infantile Mortality for the past 10 years:—

1914 1913 1915 1916 1917 1918 1919 1920 1921 1922 65.0 94.1 69.6 83.7 57.287.1 45.3 75.1 56.6

Comparative Infantile Mortality. The Infantile Mortality of the 105 County Boroughs and Great Towns of England and Wales during the year was 72, as compared with the figure of 59.8 for Bournemouth.

(c) Midwives Act. During the year 27 midwives notified their intention to practise in Bournemouth, 26 being trained and 1 untrained.

One hundred and fifteen records were received concerning the sending for medical assistance by midwives. In 25 of these cases the doctors' fees were paid by the Health Authority, the whole of

the fee being recovered in 2 and a part of the fee in 4 instances.

The following Table gives the causes for which the Midwives required medical assistance during the year 1923:—

- (d) Provision of Milk. Under the Maternity and Child Welfare Act, 1918, milk was supplied free or below cost to 251 mothers and children during the year, the average daily number receiving milk in this way being 106. The expenditure during the year amounted to £630 as compared with £540 during 1922 and £590 during 1921. A Government grant of 50 per cent. is received in relief of this as of all other Maternity and Child Welfare expenditure.
- (e) Ophthalmia Neonatorum. During the year 12 notifications were received in respect of this inflammation of the eyes. All the cases were mild, but in 4 instances it was considered advisable to admit the mother and child into Hospital. The

notifications of Ophthalmia or threatened Ophthalmia have been made without delay, and prompt measures were taken in each case, which thereafter was kept under observation.

TUBERCULOSIS DISPENSARY.

During the year 1923 the Dispensary was open on 151 afternoons.

There were 413 patients under treatment, their attendances averaging 3.01 each.

The total number of attendances of patients was 1,247 as follows:—

Adults, male	464	-
Adults, female	29 8)
Children, male	251	
Children, female	. 234	-

1247

Average attendance per session, 8.25 patients.

SANATORIA. Early Cases:	No. of patients	No. of patient days.
Adult Bournemouth patients who received treatment during 1923 in:		
Royal National Sanatorium, Bournemouth Other Sanatoria Children sent to St. Catherine's	58 4	5452 622
Home, Ventnor	18	1790
Adult Bournemouth patients who received treatment in: Firs Home, Bournemouth Other Institutions	$21 \\ 5$	$\frac{3207}{242}$
Adult Bournemouth patients who received treatment in: Royal Sea-Bathing Hospital, Margate, and the Royal Victoria and West Hants		207
Hospital, Bournemouth	2	205
	108	11518

The actual number of Bournemouth patients who received treatment in institutions during 1923 was 100.

Of these, 58 were "early" adult cases, including 3 ex-Service men whose disease was due to military service.

Twenty-two were "advanced" adult cases, including 4 ex-Service men whose disease was due to military service.

Two were "surgical" adult cases, both being ex-Service men whose disease was due to military service.

Eighteen were children suffering from delicate chests.

TUBERCULOSIS.

The number of deaths that occurred from Tuberculosis of the Lungs during the year was 80. On the Registrar General's estimate of the population of 82,200 this gives a rate of .97 per thousand, while on the estimate of the population for the year 1923 based on the true Census figure the rate is .83 per thousand.

This mortality rate for Bournemouth continues its progressive decrease which has continued during the past 50 years in the country at large and even to a greater extent in Bournemouth, the only time when the disease showed no continued decrease in its mortality being the years of the Great War.

INFECTIOUS DISEASE

No serious spread of any infectious disease occurred in the County Borough during the year.

Forty-nine patients suffering from Diphtheria were notified, 1 of whom died. One hundred and eighteen cases of Scarlet Fever were notified, 2 of whom died.

The cutbreak of Measles that occurred at the end of the year 1922 continued during the first few months of 1923 and it was considered advisable to close some of the Infants' Departments of the Elementary Schools.

BOURNEMOUTH SANITARY HOSPITAL.

During the year 224 cases were admitted into the Hospital. Of these, 184 were Bournemouth patients, and 40 were admitted from outside the County Borough. The following table refers to Bournemouth patients:—

Hospital Table No. 1.

COUNTY BOROUGH OF BOURNEMOUTH.

Sanitary Inspector's Department. Town Hall. Bournemouth. 16th May, 1924.

TO THE MAYOR AND TOWN COUNCIL OF THE COUNTY BOROUGH OF BOURNEMOUTH.

Mr. Mayor and Gentlemen,

I beg to submit for your consideration the Annual Report upon the work carried out by this Department during the year ending 31st December, 1923.

SPECIAL REPORTS.

Reports on the undermentioned subjects have been submitted to, and considered by, your Health Committee during the period under review, and the necessary action taken:-

- (1) Increase of Rent and Mortgage Interest (Restrictions) Act, 1920.—Departmental action.
- (2) Shops Act, 1912 and 1920:
 - (a) Holiday Closing.
 - (b) Outworkers.

 - (c) Early Closing.(d) Intervals for Meals.
- (3) Milk and Dairies (Amendment) Act, 1922.
- (4) Milk (Special Designations) Order, 1922.
- (5) Public Health (Condensed Milk) Regulations, 1923.
- (6) Sale of Food and Drugs Act.
 - (a) Quarterly Reports.
- (7) Pig Keeping.

- (8) Common Lodging Houses.
- (9) Factory and Workshops Act, 1901.
 - (a) Reports under Section 5.
 - (b) Notices of Occupation.
 - (c) Bakehouses.
 - (d) Celluloid Regulations, 1921.
- (10) Public Conveniences. Employees hours of duty.
- (11) Workshop, rear of 14, St. Michael's Road. (Conversion of workshop into dwelling house.)
- (12) House to House Inspection re overcrowding and Housing conditions.
- (13) Smoke Observations.
- (14) Itinerant show grounds.
- (15) Tents, Vans, Sheds and similar structures used as dwelling houses.
- (16) Street Ambulance.
- (17) National Rat Campaign.
- (18) Bi-weekly collection of House Refuse and provision of Ash-bins.

RE CINEMAS AND PICTURE PALACES.

The special arrangements made under your Authority for the regular disinfecting of these premises by the Public Disinfector once a fortnight has been continued throughout the year, and the cost of his time and materials has been defrayed by the Proprietors.

Inspections have also been made of these premises with regard to the provision for Sanitary Conveniences, Lighting and Ventilation, and reports submitted to the Finance Committee when the renewal of licences was under consideration.

SMOKE NUISANCES.

	No. 1	No. 2	No.3	No. 4	Total.
General Inspections	 1	1		_	2
Smoke Observations		1		_	2

Particular observations were made of a certain laundry, and a report was submitted to your Health Committee thereon.

THE FACTORY AND WORKSHOPS ACT, 1901-1907.

The total number of workshops and work-places now registered in the Borough is 852, an increase or 12 on that of last year.

During the year 63 new workshops have been registered, 74 workrooms have been measured, and 76 cards, re cubic space, etc., have been supplied to the occupiers.

In all cases where nuisances have been found, notices have been given to the owner or occupier of the premises to remedy the defects, and it is very satisfactory to report that in every instance the nuisance has been abated without resort to legal action.

During the year 1,835 inspections, including Bakehouses and Restaurants, have been made, and Notices have been served.

The Occupation Cards have been revised, and are brought up-to-date.

The following is the list of workshops on the Register at the end of the year, classified according to trade, and showing the number of rooms occupied:—

Trade.	Premises Regis	tered Rooms Occupied.
Bakehouses	75	87
Kitchens of Restaurants, &c.	51	51
Dressmakers and Milliners	172	217
Tailors	96	118
Bootmakers and Saddlers	104	115
Laundries	49	98
Carpenters and Builders	68	72
Cabinetmakers and Upholsterer	s 44	66
Coachbuilders	24	38
Watchmakers and Jewellers	18	20
Metal Workers	37	52
Cycle Builders and Motor Work	s 48	. 60
Miscellaneous	66	102
	852	1096

BAKEHOUSES.

Of the 75 bakehouses occupied in the Borough, three are occupied as underground bakehouses, and the remainder are on, or above, the ground level.

The underground bakehouses are certified by your Authority to be suitable (as regards light, ventilation, construction etc.) for use as bakehouses.

During the year four bakehouses have been added to, and three deleted from the Register.

The whole of the Bakehouses in the Borough have been cleaned or limewashed twice during the year, in accordance with the requirements of the Act. One hundred and eighty-seven visits have been made to these premises during the year.

KITCHENS OF RESTAURANTS, ETC.

These premises, fifty-one in number, have been inspected, and special attention has been given to the cleanliness of the larders, tables and cooking utensils, and these have been found to be satisfactory.

HOMEWORK.

During the year 74 lists containing the addresses of 154 "Outworkers" have been received.

Fifteen of these were residing outside the Borough, and the usual particulars were sent to the Authorities of the Districts in which the work was done.

Seven addresses were received from outside Authorities.

One hundred and thirty-nine visits were made to Outworkers' premises, and in no instance was it found necessary to serve a notice for the abatement of nuisance.

Two employers of Outworkers failed to send in their list of Outworkers at the specified time. A letter of warning was sent, and the requirement was subsequently complied with.

REGISTRIES FOR FEMALE AND DOMESTIC SERVANTS.

The number of premises on the Register at the end of the year was 27, an increase of six on that of last year.

Forty-nine surprise visits have been made from time to time to the premises, for the purpose of enforcing the provision of the Bye-Laws relating thereto.

SHOPS ACT, 1912

The total number of shops on the Register at the end of the year is 2,089, an increase of 140 on that of last year. During the year 3,109 visits have been made to shops in the Borough under the Act.

In 49 cases the Exempted Trade Notice under the second Schedule, in 75 cases the Assistants' Weekly Half-Holiday Notice under Sect. I, and in 63 cases the Young Persons Notice under Sect. II. were not found to be affixed as required by the Act.

In all cases a verbal warning was sufficient, the requirements being subsequently complied with

Sixty-four Warning Notices re Sale of Celluloid Articles were delivered.

Fifty-two special inspections have been made with regard to the sale of non-exempted goods on the half-day of closing.

Ninety special inspections have been made with regard to the new order of the Shops (Early Closing) Act, 1920.

In sixteen cases proceedings were taken under the above Order, and convictions obtained, with a fine including costs in each case. (Two cases fined £1 each, two cases fined 10s. each, ten cases fined 5s. each, and two cases fined 2s. 6d. each.)

Each new shop opened in the Borough during the past year has been supplied with a copy of the Extracts of the Shops Act.

One hundred and eighty-four shops have been visited with regard to the employment of young persons, and in no case was a young person found working beyond the prescribed hours.

DAIRIES, COWSHEDS AND MILKSHOPS ORDERS.

To enforce the regulations relating to cleanliness, limewashing and general sanitation, four hundred and forty-three inspections have been made of cowsheds, dairies and milk purveyors' premises in the Borough.

Visits	to	Dairies		210
Visits	to	Milkshops	•••	241
Visits	to	Cowsheds	• • •,	31
			·	
				482

The half-yearly limewashing of premises was in every instance carried out after notice had been given by your Inspector. There are now only four cowsheds in the Borough.

MILK AND DAIRIES (Amendment) ACT, 1922. Extract from Registers on 31st December, 1923. No. of producers (residing outside the Borough) who have been registered to sell by retail in the Borough 5 No. of producers (residing in the Borough) who have been registered both as producers and 3 as retailers No. of producers (residing in the Borough) who have been registered to sell by wholesale 2 only No. of shop proprietors, etc., who have been registered as retail purveyors of milk

Milk (Special Designations) Orders, 1922.

On the 31st December, 1923, there were in the Borough nine premises licensed for the sale of graded milk which in each instance was obtained from licensed producers of "Certified" Milk.

GENERAL INSPECTION OF FOOD SUPPLIES.

During the year, 5,099 visits have been made to shops in the Borough for the inspection of Meat and Food Supplies, and with regard to the cleanliness of the premises and stores.

Periodical and regular inspections of the Meat Supplies form an important part of the Food Inspector's duties, and the appended tables show how essential these inspections are

By arrangement with the retail traders, early morning inspections of meat are made before the meat is "weighed in" by the butchers, in all cases where the carcases have been slaughtered outside the Borough.

Members of the Master Butchers' Association have rendered great assistance to this Department in calling attention to diseased or doubtful carcases, and it is now customary for the butcher to obtain the Inspector's opinion of a doubtful carcase before the purchase is completed.

The following quantities of meat and other foods were destroyed as being diseased or unsound and unfit for consumption:—

Butchers'	Meat	(disea	sed)	•••	•••	2,319	lbs.
Butchers'	Meat	(unso	ınd)	•••	•••	7,412	"
Fish	•••	•••	•••	•••	•••	1,953	,,
Fruit	•••	•••	•••	• • •	•••	4,602	,,
Vegetables	S	• • •	•••	•••		3,888	,,
Eggs (liqu	iid)	•••	•••	•••	•••	298	,,
Tinned Go	oods			• • •	• • •	316	

The following is a classified summary of the Food Purveyors' premises visited by the Food Inspector:—

Butchers' Premises		• • •	3,168	visits
Fishmongers and Poulterers'			936	,,
Greengrocers'	• • •		420	"
Grocers'	• • •		258	, ,
Ice Cream Vendors' Premises		• • •	61	12
Hawkers' Carts	• • •	•••	256	"
			5,099	,,
			•	,

SLAUGHTERHOUSES.

There are six slaughterhouses in the Borough, at each of which the Regulations as to periodical limewashing, cleansing, etc., have been carried out. Five hundred and eighty inspections have been made of these premises during the year, particular attention being paid to the slaughtering of pigs.

It is satisfactory to report that in this Borough the Master Butchers insist on their employees taking all reasonable precautions to secure the humane slaughter of animals and using proper and suitable instruments for this purpose.

The number of animals slaughtered during the year is as follows:—

Beasts	• • •	• • •	656
Sheep		• • •	6871
Calves			2083
Pigs	• • •	• • •	1764
			11374

Strict inspections clearly prove that it is essential, both in the interests of the Public Health and the Pig Trade generally, to examine carefully all carcases before exposing them for sale.

THE FERTILISERS AND FEEDING STUFFS ACT.

No samples have been submitted during the year.

PRIVATE SCHOOLS.

The total number of Private Schools in the Borough is 59, comprising 239 classrooms, and the average number of scholars in attendance at these schools is 2,149.

The sanitary arrangements of the larger private Schools have been examined, and the drainage tested at the end of each term, and reports as to repairs, cleansing, etc., made to the Principals.

This periodical examination has proved to be a precautionary measure where the number of boarders necessitates large households being maintained.

PUBLIC SCHOOLS.

The sanitary conveniences of the public Elementary Schools have also received systematic attention from the Drain-Testers who are responsible for the daily cleansing and disinfection of all the fittings, etc. The conveniences are thus maintained scrupulously clean, and the scholars are induced to make proper use of them.

WART DISEASE IN POTATOES.

No cases of Wart Disease were reported during the year.

RAG AND FLOCK ACT REGULATIONS.

Inspections have been made of the premises where flock is used for manufacture of bedding, upholstering, etc.

HOUSING CONDITIONS.

COMMON LODGING HOUSES.

There are only two registered Common Lodging-houses in the Borough. The general supervision of common lodging-houses is under the control of the Police.

FRIED FISH SHOPS.

There are now 15 of these shops in the Borough, and from time to time inspections have been made as to the cleanliness of the premises, soundness of fish supplies, and ingredients used in the trade.

BATHING STATION.

There has been a marked decline in the number of persons receiving treatment for Scabies, etc., no baths having been administered during the year 1923.

Houses with de						
ascertained		11	4		3	18

During the year, 195 Reports (see above table) have been made to the Medical Officer of Health upon notified and suspected Infectious Cases. The sanitary arrangements and drainage of the premises

occupied by the patients have been examined and tested, and 12 Preliminary Notices have been served on the owners or occupiers of these premises calling upon them to abate the nuisances ascertained. These notices have been satisfactorily complied with.

CESSPOOL DRAINAGE.

WINTON AND MOORDOWN DISTRICT.

No. of Cesspools emptied		193
No. of loads of sewage removed		511
No. of cesspools condemned	and	
filled in		5

There are now only 25 houses with cesspool drainage and 18 with the pail-closet system, and these are situated principally in the outlying parts of Moordown, Charminster, Castle Lane, Ensbury Park, Victoria Park, and in roads that cannot at present be sewered owing to the existing level of sewers.

POKESDOWN DISTRICT.

No.	of c	esspools	s emptie	ed		27
No.	of lo	oads of	sewage	remove	ed	110
			filled in			Nil

There are now 21 houses with cesspool drainage and 12 with pail-closet system in the districts of Tuckton and Wick.

PIGGERIES.

WATER METERS.

Meter Readings of the consumption of water supplied by the Bournemouth Gas and Water Co. and the West Hants Water Co. to your Authority are taken every month (142 meters) and a comparative statement submitted each month to the Finance, etc., Committee.

The readings of the meters, 32 in number, at the Schools are taken fortnightly and a comparative statement submitted to the Education Authority.

Wherever a large increase is detected an inspection of the water fittings is always made and a report thereon submitted to the Committee.

Hereunder is a comparative statement of the consumption of water supplied by the Companies to your Authority for the years 1922 and 1923.

SALE OF FOOD AND DRUGS ACTS, 1875-1907.

Inspector: Mr. W. D. CARTER.

During the year, 400 samples of Food and Drugs were obtained, of which number 294 samples were purchased formally or "taken" in accordance with the provisions of the Acts and 106 samples were purchased informally and submitted as "Test" samples to the Analyst.

Of the 400 samples,

327 or 81.75 per cent. were reported genuine.

49 or 12.25 per cent. were poor or doubtful in quality.

24 or 6.00 per cent. were adulterated, or in some way deficient.

	Adulterated,	Poor or doubtful,
	per cent.	per cent.
Official	6.80	12.58
Unofficial	3.77	11.32

Tables showing the various articles analysed during the year, with the results of the analyses, will be found in the Public Analyst's Report, Tables II. and III.

MILK.

One hundred and twenty-two samples of Milk were officially purchased or taken and submitted to the Public Analyst, who reported adversely upon thirty-six of the samples.

Of the adulterated samples nine were deficient in milk fat and three contained added water, etc.

Fifty-six samples were submitted to the "Gerber Test" by your Inspector; the whole of the samples were taken from consignments of milk in course of delivery to dairy men in the town. Seven of these samples were of poor or doubtful quality and three were adulterated.

For the detection of the poorer supplies, and subsequent administration regarding them, these examinations are of increasing utility.

BUTTER.

Twenty-eight formal samples and three informal samples of butter were purchased; none was aduterated.

DRUGS AND PRESCRIPTIONS.

Thirty-four samples of Drugs, including Cream of Tartar and Tartaric Acid, were sent for analysis.

The Public Analyst reported adversely upon the following informal samples:—

Article.		No.	Genuine.	Poor or Doubtful,	Adulter-
Cream of Tartar	 	9	8		1

5	No. of Preliminary Enquiries made		•••	46

Income.

£17 12s. 0d.

Expenditure.

£14 11s. 4½d.

GENERAL REMARKS.

- 1. The number of rats killed with dogs and ferrets during the year, including the number given above for the 8th Campaign, is 968. With the exception of one or two affected with mange, the rats caught were found to be in a clean, healthy condition.
 - 2. No black rats were found.
- 3. The Parks, Chines, Cliffs, Pleasure Grounds, Allotments, Piggeries were systematically hunted during the Campaign.
- 4. The greatest number of rats were caught under fowl-houses, pig-stys, etc.
- 5. Vermin-proofing of premises on the lines suggested in my Annual Report for 1920, is the best protection against the activities of this destructive pest.

CORPORATION HOUSING SCHEME.

The Scheme for this town comprises 164 houses, of which 162 were built by contract for the Corporation and 2 given to the town by the Builders' Guild. Each house contains at least three bedrooms, parlour and offices (including bathroom), and the rent is inclusive except for the water rate.

The following is an analysis of the Scheme:-

Ministr	У		No. of	Houses.	
Type.		Rent.	Southill:	Carbery.	Tota1

			 164

DIVISION OF FOUR-BEDROOMED HOUSES.

Four such houses have been adapted so that each may accommodate two families. Two of these are on the Southill and two on the Carbery Estate. The tenant of each part-house is responsible to the Corporation for one-half of the total rent for the house.

SUB-TENANCIES.

On receipt of a written application from the tenant, the Committee have granted permission to

sub-let to another family, provided that the subtenancy includes a sitting room, a bedroom (with a fireplace therein), joint use of scullery fittings, bathroom and W.C. The sub-tenant is liable for not more than half of the rent and water rate, which is paid direct to the superior tenant. At the end of December, 1923, there were fifty-one subtenancies recorded in the Register.

POULTRY KEEPING, ETC.

On receipt of a written application from the tenant or sub-tenant, the Committee has granted permission to keep poultry, provided that the number kept does not at any time exceed eight and that the height of the shed in which they are housed is not more than five feet.

At the end of December, 1923, there were 42 poultry runs on the Southill and 33 on the Carbery Estate.

SHEDS OTHER THAN POULTRY SHEDS.

Applications to erect cycle sheds, etc., were generally granted subject to any conditions imposed by the Buildings Committee, and a list of such applications was handed to that Department.

At the present time there are 13 such sheds on the Southill and 8 on the Carbery Estate.

GENERAL SUPERVISION.

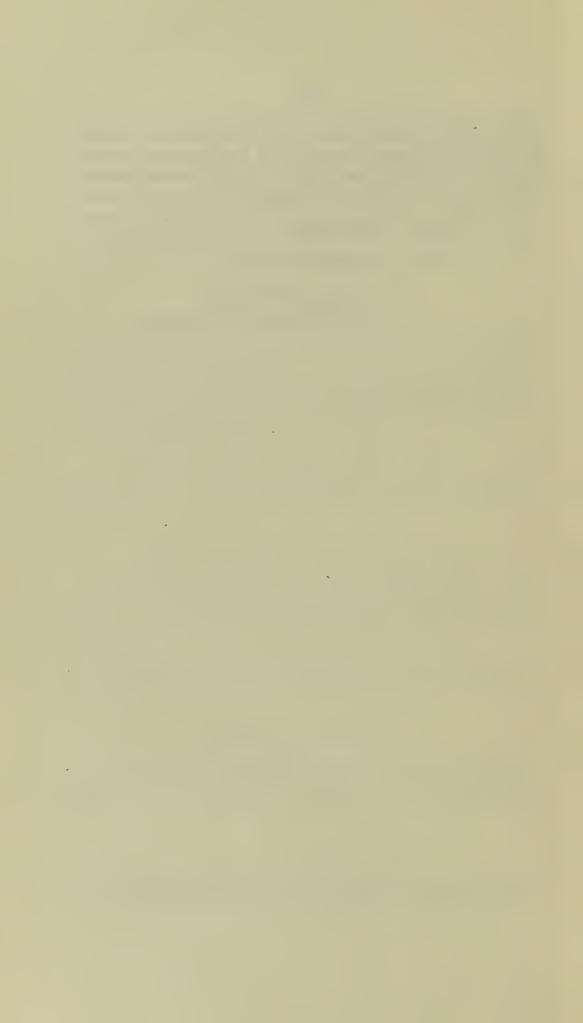

During the year, 234 visits have been paid to the Corporation Housing Estates by this Department.

I beg to express my best thanks to the Chairman and Members of the Health Committee for

their careful consideration of all questions relating to the Department's work and welfare, and to the District Inspectors and Staff for the valued assistance which they have willingly given at all times.

I remain, Gentlemen,

Your Obedient Servant,
WM. GEO. COOPER,
Chief Sanitary Inspector.

COUNTY BOROUGH OF BOURNEMOUTH.

ANNUAL REPORT

OF THE

Public Analyst

For the Year ending 31st December, 1923.

TO THE MAYOR AND TOWN COUNCIL, BOURNEMOUTH.

GENTLEMEN,

I beg to present my report upon the Samples of Food and Drugs submitted to me for analysis during the year 1923.

The total number of samples was 400, of which 294 were official, i.e., taken with the usual formalities of the Food and Drugs Acts, and 106 were unofficial.

The number of adulterated samples was 24 (6.0 per cent.), whilst the "poor or doubtful" samples were 49 (12.25 per cent.). Twenty (6.8 per cent.) of the adulterated samples were official and four (3.77 per cent.) unofficial or informal; of the "poor or doubtful" samples 37 (12.58 per cent.) were official and 12 (11.32 per cent.) unofficial.

Table 1 shows the comparison of these results with those of the previous ten years:—

282 Milk .,

Observations.

Should contain no Boric acid. Quantity present was equivalent to 16·1 grains per pound. Equivalent to 6·3 grains per pound. Equivalent to 5·6 grains per pound. Equivalent to 21·7 grains per pound.

Contained only about 1-fourth the average amount of Citric Acid found in lemons. The description "Concentrated Lemon" is therefore false.

Contained 40 parts per million of lead. The maximum allowed by the British Pharmacopeoia is 20 parts per million,

Table V.

Adulterated unofficial samples:—

Nature of Sample.	Nature of Adulteration.	Observations.
Scidlitz Powder	Blue packet deficient 4.2 % of its weight. White packet 5.3 % in excess of its weight	
Seidlitz Powder	Blue packet 16.7% in excess of its weight. White packet	
Lime Juice Cordial	0.38 per cent. Phosphoric Δcid	21 °/° of total acidity due to this adulterant.
Sponge Cakes	Boric acid 0.11 per cent	Should contain no Boric acid; quantity present was equivalent to 7.7 grains per pound.
	Scidlitz Powder Seidlitz Powder Lime Juice Cordial	Scidlitz Powder Blue packet deficient 4·2 °/o of its weight. White packet 5·3 °/o in excess of its weight Blue packet 16·7°/o in excess of its weight. White packet 2·44 °/o in excess of its weight United Discreption of the packet 10·38 per cent. Phosphoric Acid

MILK.

Excluding the 12 adulterated samples, the average composition of the remaining 110 samples was:—

Fat 3.58 per cent. Non-fatty solids 8.98 per cent. these figures being almost identical with the averages for 1922.

The averages for the four quarters of the year (excluding the adulterated samples) have been:—

		Samples	Fat of	Solids Non-Fat 9/0
1st Quarter		 26	3.54	9.00
2nd ,,	• • •	 29	3.57	9.09
3rd ,,		 27	3.50	8.87
4th ,,		 2 8	3.71	8.97

As in 1922 no colouring or preservative has been detected.

CONDENSED MILK.

On May 1st, 1923, the Ministry of Health issued Regulations relating to the Sale of Condensed Muk, under which it is compulsory inter alia that:—

(a) Labelling.

1. Every tin of condensed milk must bear a label specifying its description (e.g., full

cream, unsweetened), and stating the equivalent volume of milk (or skimmed milk) contained in the tin.

- 2. Every tin of condensed skimmed milk must be labelled "Unfit for Babies."
- 3. The name and address of the manufacturer of the condensed milk must appear on the label.
- 4. Any instructions as to dilution placed on a tin of condensed milk must be quantitatively accurate.
- 5. For the purposes of these Rules milk means milk which contains not less than 12.4 per cent. of milk solids (including not less than 3.6 per cent. of milk fat), and skimmed milk means milk which contains not less than 9 per cent. of milk solids other than milk fat.

(b) Composition.

Condensed milk must contain not less than the following percentages:—

		Milk Fat per cent.	All Milk Solids per cent.
Full cream, unsweetened	•••	9	31
Full cream, sweetened		9	31
Skimmed, unsweetened			20
Skimmed, sweetened	•••	. —	26

(c) General.

The Regulations apply to all condensed milk intended for sale for human consumption whether produced in this country or imported from abroad.

These Regulations should do much to prevent the starving of infants through the ignorance of the public or the cupidity of the makers.

DRIED MILK.

Regulations have also been issued on November 25th, 1923, under the title "Public Health (Dried Milk) Regulations, 1923," in which it is provided that:—

"No person shall sell or expose for sale any dried milk intended for human consumption unless the dried milk contains not less than the following percentages of milk fat, namely—

In the case of milk described as dried full cream milk, not less than 26 per cent.;

In the case of milk described as dried threequarter cream milk, not less than 20 per cent.;

In the case of milk described as dried half cream milk, not less than 14 per cent.; and

In the case of milk described as dried quartercream milk, not less than 8 per cent."

The tins or other receptacles containing Dried Milk must be correctly labelled as the case may be—

Dried Partly Skimmed Mik
(Three quarters Cream)

Dried Full Cream Milk

Dried Partly Skimmed Milk or Dried Machine Skimmed Milk (Half Cream) (Dried Skimmed Milk)

For the purposes of this Rule the terms "Milk," "Three-quarter cream milk," "Half-cream milk" and "Quarter-cream milk," mean milk containing not less than the following percentages of milk fat and milk solids, that is to say:—

		Milk Fat.	Milk Solids (including Fat
Milk	• • •	3.6	$12 \cdot 4$
Three-quarter cream milk		2.7	11.6
Half cream milk		1.8	10.8
Quarter-cream milk	111	$\cdot 9$	$9.\overline{9}$

and "Skimmed Milk" means milk which contains not less than 9 per cent. of milk solids other than milk fat.

SPONGE CAKES.

Thirty-four samples were examined and of these seven contained Boron Preservative, the quantity ranging from traces to 0.31 per cent. (21.7 grains per pound). This is an improvement upon the results obtained last year when 39 samples were tested and 17 contained preservative; the results, however, show the importance of continued vigilance in regard to articles of this nature.

It is important to note that in consequence of the activity of the Authorities, the following resolution was passed by the Bakery Allied Traders' Association on February 1st, 1923:—

- "That its members should sign a bond that in future the sale of liquid whole egg should be under the following conditions:—
 - (1) Sale only to be made on the understanding that Liquid Whole Egg must not be used in the manufacture of Sponge Fingers, Sponge Biscuits and 1d., $1\frac{1}{2}$ d., and 2d. plain Sponge Cakes.
 - (2) That all Invoices should bear a statement to the buyer that Liquid Egg must not be used in the manufacture of Sponge Fingers, Sponge Biscuits, and 1d., $1\frac{1}{2}$ d., and 2d. plain Sponge Cakes.''

It may be observed that the fingers, biscuits and small cakes to which this resolution relates are those which are most likely to be used by infants and invalids.

If effect is given to the decisions of the Association the danger of the presence of excessive pre-

servatives in cake will be substantially reduced. Local authorities will, of course, be able, as at present, to take proceedings uder section 3 or section 6 of the Sale of Food and Drugs Act, 1875, in any case in which they consider that the amount of Boric Acid found in a sample of cake (whether within the scope of the Association's second resolution or not) is excessive.

In conclusion, it is satisfactory to note that the percentage of adulterated samples is one of the lowest in my experience.

I am,
Mr. Mayor and Gentlemen,
Your obedient Servant,
R. A. CRIPPS.
